## **Financial literacy**

We work with high school students to prepare them for the financial cost of attending a university. Our workshops allow students to understand the full cost of attending a university. Additionally, we work to connect students to funding opportunities to help them pay for the college educations. We set up the estimated cost for student to attend the university of their choose in addition to connecting them to grants and scholarships. At the end of our program, our goal is to leave students with a plan to pay for their college educations.
