

## **ABQid Idea Hacks**

The ABQid idea hacks bring together motivated rule breakers who strive to out think the status quo and break out new ideas that can be applied to a business model.

We take big problems and apply our individual and collective knowledge, experience and creativity without rules for the solutions we create. We tackle real problems and attempt to change the conversation in a big way.

Idea hacks are an opportunity to work with a diverse and interesting group of people to solve problems.
