Professional development for educators (in-school and out-of-school)

More than 130 unique courses are available addressing instructional best practices, skills and content knowledge with a focus on science, technology, engineering and math (STEM). The offerings are designed and facilitated by experienced classroom teachers, vetted through a rigorous Research & Development process and customized to meet educator needs. Professional development may be accessible via in-person, videoconference and/or blended (in-person and videoconference).
