CAPPED Sun Safe Program

Our annual children's Sun Safe Program is presented to children in 16-18 schools by CAPPED Volunteers and Staff. Floppy bucket hats and Sun Safe Pamphlets are given to each child participating the presentations. New presenters are trained by staff each year for the program. We have reached more than 36,000 children with the message of respect for the sun and responsibility for their sun exposure since 2003.

Details

Minimum Age: birth

Maximum Age: death
