Carlsbad Mental Health Association

Provides service and specialized assessment, mental health evaluations, intellectual and cognitive evaluations, psychological evaluation, emergency mental health evaluations, support services, counseling, professional clinical consultations, family services, life skills development, and crisis intervention. The Juvenile Community Corrections program provides youth with multiple programs with the goal to provide the youth with positive role models. Most youth are referred to this program by Juvenile Probation and Parole. The First Offenders Program uses group based interventions for youth who have had their first experience with the law.
