Community Outreach and Patient Empowerment

We believe that the power to overturn long-standing, historical health inequalities lies inherently in Native communities themselves. By investing in existing community resources and aligning our work with the vision of tribal leadership, we hope to help catalyze this transformation within our lifetime.

Our vision is to eliminate health disparities and improve the wellbeing of American Indians and Alaska Natives. We believe that the power to overturn long-standing, historical health inequalities lies inherently in Native communities themselves. COPE strives to promote healthy, prosperous, and empowered Native communities through three collaborative approaches: Robust, community-based outreach; Local capacity building and system-level partnerships; and Increasing access to healthy foods.
