Resiliency and Well-Being

The Resiliency and Well-Being Program addresses longer term, systemic issues in the community and toward more inclusive sustainable development solutions through our Immigrant Advocacy Center based on the Sustainable Development Goals (SDGs), a blueprint to achieve a better and more sustainable future for all.

Our case workers provide an inclusive sequenced set of services tailored to culture/context/population giving a programmatic boost to break the “deprivation of basic capabilities” often found in our client community. These interventions include livelihood training, transfers of cash and productive assets, and encouragement of savings, all facilitated through in-person coaching
