Parent Organization

Enhancement Center, PC

Our mission is to improve the quality of life of individuals and families by providing effective and compassionate behavioral healthcare. It is important for everyone in our community to have access to quality behavioral healthcare.

Counseling is more than just talking about your problems. A mental health therapist is someone that works in collaboration with you to develop an effective plan to address your needs. Our therapists are trained to assess the whole person and their environments in order to more fully understand your needs. They are also trained in problem solving, facilitating communication, cultural sensitivity, and utilizing other community resources.
