FII-Albuquerque (Family Independence Initiative)

We support the self-determined economic and social paths of families by providing a technology platform where they strengthen social networks, access resources, set goals and monitor progress, and support one another in achieving mobility. This platform provides a continuous feedback loop that drives our work forward, in response to community initiative and results, and drives each family's progress towards their goals. By communicating family data and stories to policymakers, funders, and other third parties, we are shifting the perceptions about low-income families that impact practices and policies to ones that celebrate the creativity and resourcefulness of low-income families.
