Freedom High School

Freedom High School is a diploma-granting school of choice that provides educational services for students in grades 10-12 who have determined they may benefit from a personalized, small school setting. Freedom High provides an alternative setting for students in order to stress respect, cultural diversity, creativity, and personal growth. The alternative setting allows students to complete their high school education. Students work at their own pace in classrooms with low student to teacher ratios. Students are expected to take responsibility for their education.
