GRACE - Giving Respect and Compassion to Expecting Moms

Giving Respect and Compassion to Expecting (GRACE) moms provides comprehensive and compassionate prenatal care to women living with substance abuse in New Mexico, including tobacco. Patients will receive prenatal care at one of our Lovelace Medical Group clinics, where we offer treatment based on your needs. Our dedicated GRACE navigator will support patients throughout pregnancy, during the hospital stay for delivery, and in the first weeks after birth. Our goal is to make every pregnancy and delivery as healthy as possible.
