Halvorson House Residential Treatment Center

The RTC serves adolescents ages 12 to 17 whose primary diagnosis is an emotional, behavioral or neurobiological disorder. RTC clients may also have a secondary diagnosis of substance abuse. Services provided include weekly individual and family counseling with a licensed master's level therapist. Daily groups incorporate therapeutic, educational and recreational activities. The program operates twenty four hours a day, seven days a week in a highly structured setting. Treatment planning is individualized and success in the program is measured by the clients ability to achieve their goals and objectives. Behavior is monitored daily through a point system and privileges are earned utilizing that system.
