## Healthy Native Communities Partnership (HNCP)

HNCP is focused on ongoing engagement with our community partners – not “one-shot” training sessions. We are not “outside consultants”, but active partners with an aim to develop and support local community change leaders.

- Community Wisdom – the answers we seek are already present in our communities
  - Cultural knowledge is the foundation of successful programs and interventions
  - The leaders we need are already here
  - Health is created at the level of families and communities
-

## Parent Organization

## Healthy Native Communities Partnership (HNCP)

Healthy Native Communities Partnership, Inc. (HNCP) is a national non-profit organization that works with Native communities to realize their own vision of wellness. We support capacity building, leadership development, partnership, and networking from the wisdom and strengths of local communities.
