Free Hospice Home for those in their Last Days to Weeks

We believe that people nearing death deserve better than an impersonal facility, street, or lonely house - they deserve a caring home. And they have more important things to think about than whether or not they can afford compassionate care - it should be available for free. So, we offer a home with 3 private rooms and amenities including chef-made-meals for family members with 24/7 caregiving at no cost thanks to volunteers and donors.
