Programming and Code for Education

M3MAST has been doing a great job of bringing new programs to the youth in the community. The next programs that should be put into effect are Programming and Code for Education and the Mach 3 Entrepreneurship. Programming and Code for Education and Mach 3 Entrepreneurship will be worked together in phases to maximize the most effective way of learning by the students. There will be four phases. Once phases are completed the students will come together as one team/business to build a website advertising their new business services, website building & hosting and management. They will research and come up with prices for the services they offer. They will design a social media platform for their business to use as a form of advertisement while constantly focusing on the four Ps of marketing.

Details
