Summer Discovery Program

Dates: June 6th - July 15, 2016

The Summer Discovery Program is for students who range in age between 3 ½ and 11 years old. The program will ignite *Joy in Learning*® in your young child by stimulating creative and critical thinking while he/she participates in playful activities in a nurturing environment. Children are guided through exploring, experimenting, and problem solving activities, providing unlimited opportunities for experiencing success and gaining self-confidence.

Each teacher involved in our Summer Discovery Program is highly trained in guiding this type of learning process. They work with each student, understanding their specific talents, personality, and skill-level. Classes remain small so that each child receives individualized attention. Our educational philosophy inspires excitement in self-discovery and helps to develop a lifelong interest in learning.

Details

Ages: Children and Youth

Minimum Age: 3 1/2 years

Maximum Age: 11 years
