Our services include but are not limited to [Suboxone Therapy](#), [Opioid Addiction Treatment](#), [Telehealth Addiction Treatment](#), [Substance Use Disorder](#), and [Drug Testing](#).

Options for Treatment

Medications for Addiction Treatment

Buprenorphine is a medication used to treat cravings and withdrawal symptoms from opioids.

Naloxone is a medication that can reverse the life-threatening effects of opioids when given intranasally.

Naltrexone is a medication that can be given orally or by injection. This medication can be used to treat various substance use disorders including alcohol and opioids.

Disulfiram and **Acamprosate** are other medications that are indicated for alcohol use disorder. They are prescribed with the aim to promote abstinence.

Varenicline and **Bupropion** are medications that can be used to aid with tobacco use disorder.
