

Las Cruces Children's Outpatient Clinic

Our professional staff has extensive experience in providing rehabilitative therapy services to children and young adults. Individuals referred to our clinics are offered a comprehensive evaluation. Following the initial visit, each patient receives detailed information about our findings plus a plan of care that includes exercises to do at home in addition to clinic sessions. Our staff will develop and deliver treatment plans which seek to build upon the patient's strengths.

Clinic patients will have the opportunity to receive therapy in a one-on-one setting. Socialization and language activities will also be available in a playgroup setting for children, if needed. Additional diagnostic and rehabilitation services that fit the needs of children and adults include:

- Education for parent, family and loved ones
- Pediatric feeding therapy (for those with difficulty swallowing)
- Sensory integration
- Dysphasia
- Hearing screenings
- Pediatric focused motor therapy
- Aquatic therapy
- Supplementary services for school-aged children
- Screening and assessments for a wide range of diagnoses

Parent Organization

MECA Therapies, LLC

MECA Therapies has been providing therapy services since 1998. MECA Therapies is comprised of a group

of 125 highly trained employees who function as a family of professionals. We employ both English-speaking and Spanish-speaking therapists to serve within our communities.

We work with clients and their families in natural settings within the home and community (home, Daycare, Dayhab, etc.) through our Early Childhood Program and Developmental Disabilities Waiver program.
