## **Mental Health Service IOP**

Intensive Outpatient Program (IOP) provides a higher level of care than outpatient substance abuse groups. IOP provides a time-limited, but highly structured environment to assist individuals with early recovery and relapse prevention. IOP programming consists of group sessions three times a week along with additional individual mental health and substance abuse counseling sessions. While this program is designed to address substance abuse issues it includes treatment related to underlying mental health issues as well to best ensure sustained recovery.
