NM Film Office

The New Mexico State Film Office serves the film and television industry locally, nationally and internationally. Their purpose is to market the state to the film industry, service the productions and promote jobs for New Mexicans. They offer many resources to producers, film crew and local filmmakers and work diligently to assist productions with finding potential filming locations. The State Film Office consults with productions regarding the financial aspects of their projects, guiding them through the incentives such as the 25% Refundable Film Production Tax Credit and the Film Investment Loan Program. They connect productions with the crew, vendor services and film liaisons throughout the state.
