## **New Mexico Solar Energy Association**

SunChaser Program: This nationally recognized program is one of our principal outreach programs. Our instructors visit schools and special events to present programs to promote energy awareness and alternative energy solutions in a format that is aligned with state education requirements and standards. Sessions are guided to stimulate students' minds and show them that learning about energy is fun! Chapters: Local chapters offer monthly programs on aspects of solar in Alamogordo, Albuquerque, Las Vegas, Los Alamos, Silver City, and Taos.
