Medication Information Hotline/Helpline

Do you need to ask someone the best way to take your prescribed or over-the-counter medication? Do you wonder about herbal products? Do you have questions about possible side effects of drugs, and whether you can take something safely with your other medications or while breast-feeding? The New Mexico Poison and Drug Information Center can give you answers to these and many more questions. You've always been able to call us and speak with an information specialist, but now you can also e-mail us for non - emergency questions. Just send your questions about your medications to LMcCament-Mann@salud.unm.edu. A pharmacist will research the answers and respond to you promptly.
