

SHARE new mexico™

Best for New Mexico

The PRB has launched *Best for New Mexico*-an honest assessment of the business landscape and opportunities in New Mexico. This free assessment, developed by B-Lab, the non-profit behind B-Corps, allows us to meet businesses where they are, beginning the process of repair and growth to our economy. Through the *Best for New Mexico* program, the PRB gathers data directly from businesses. Identifying each business' status, impact and need.

With this data, the PRB can go beyond the *Best for New Mexico* assessment to convene and connect existing resources to business, identify resource gaps, and work with businesses to create programs to fill the gaps. We can then educate, equip and celebrate businesses as we serve as a catalyst for larger changes in governance, policy, and strategy in local business support.
