## Pathways Academy

The school provides a learning environment for children with special needs. Each child has unique needs the school addresses these with individual attention. Learning skills are increased through evidence-based teaching and nurturing.

We offer classes from 1st through 12th grade. The classes are in a small school environment of no more than 40 students and class student teacher ratios of no more than 8:1. We identify each student's unique learning profile by using a variety of validated assessment tools. We offer the Alpha Effect program. The Alpha Effect is a full immersion music and art based program designed to accelerate reading, writing and improving listening and social skills. This program is available to the community, but provided at no extra charge to enrolled students of Pathways Academy. This program has proven to be effective for people of all ages.

## Parent Organization

### Pathways Academy

The mission of Pathways Academy is to provide a safe, loving, nurturing environment for vulnerable children who are at high risk of failure due to learning, social and/or emotional challenges. Through ongoing identification of each child's unique learning profile, we build upon each child's strengths and

delineate his or her weaknesses, so that we can individualize evidence-based teaching and learning strategies for each child.
