Pathways to a Healthy Bernalillo County Program - UNM Health Sciences Center

The Pathways Program and model is designed to reduce unmet needs, address health inequities, and improve the overall health of the residents of Bernalillo County. It focuses on positive health outcomes by utilizing community health navigators as care coordinators who connect at-risk residents to resources and follow their progress toward improved health outcomes.

Community Health Navigators, more commonly known as Community Health Workers (CHWs), guide individuals towards community services to resolve their outstanding needs. The Navigators work with the program participants on assuring access to health and social services such as housing, employment and health care, based on client needs. Meaningful outcomes for the participants are reached by following a step-by-step approach (Pathways) that leads to improved health while common systems issues are also brought to light and result in stronger service coordination.

Parent Organization

Pathways to a Healthy Bernalillo County

Pathways Mission:

- **Connecting** underserved county residents with health care and other support systems and assisting them as they navigate through it;
- **Coordinating** services for the underserved residents to achieve positive individual-level health outcomes;
- **Assuring** collaborative planning and improvement of our health care system.

Community defined Goals:

- People in Bernalillo County will self-report better health
- People in Bernalillo County will have a health care home
- Health and social service networks in Bernalillo County will be strengthened and user friendly
- Advocacy and collaboration will lead to improved health systems
