Community Engagement

"Develop a culture of shared responsibility for student success by engaging families and communities---we will actively engage diverse traditional and nontraditional partners who will help ensure our graduates are ready for college, careers and life-long success." "We have an open door policy and encourage our community to be actively involved in conversations with the District as we create a system of education that meets the needs of the students, parents and community we serve. We have garnered input from civic partners, nonprofit organizations, faith-based organizations, parents and others in order to provide educational opportunities that reflect the values and beliefs of our community. This approach has led to increased partnerships, the development of our mission and the creation of the attributes of the graduate, which, through this strategic plan, will drive our efforts." ----From the Santa Fe Public Schools "2018-2023 Strategic Plan," Pillar 3, Page 31
