After School and Summer STEM

Scientific Adventures for Girls (SAFG) provides after school and summer STEM (science, technology, engineering and math) programs to young children with a special focus on girls and under served youth. SAFG's goals are to increase positive attitudes toward STEM in K-5th grade female students and to increase hands-on learning opportunities for girls everywhere to explore STEM concepts and encourage lifelong learning of STEM subjects.

Parent Organization

Scientific Adventures

SAFG's mission is to remove systemic barriers to all girls' participation in STEM starting in kindergarten, engage them through hands-on learning, increase their positive attitudes toward STEM, and equip them with 21st century skills.

SAFG envisions a gender- equitable society, where all girls know their full potential and know they are capable of great things.
