## Cannabis Education & Workforce Solutions

Take the Cannabis Establishment Technician (CET) Program on your own time, at your own pace. Enroll today and have access for 12 months to the CET + HIPAA Program. This program is a standard compliance course for all Employers and Employees working in a cannabis-licensed establishment. The CET curriculum is a practical, academic curriculum. The topics covered align directly with the compliance training regulations for licensed cannabis retail, production, manufacturing, and laboratory establishments. This class provides a Certificate of Completion for job searching, onboarding of employees, and annual renewals and is good for one year, in alignment with the state of New Mexico Cannabis Control Division regulations for employee environmental, health, and safety training for the industry. Managers, Staff, and Job Applicants who enroll in the CET on the SeedCrest platform have access to a recordkeeping 5 STAR profile and can self-navigate cannabis courses and earn certificates on their timeline. Each course and program is licensed for 12 months. Refer to the NMAC 16.8.2 Regulations to learn more about regulatory training requirements for businesses and the workforce. SeedCrest is an equal and equity opportunity employer.
