

SHARE new mexico™

Screening Program

The Southern New Mexico Diabetes Outreach (SNMDO) Screening Program primarily focuses on diabetes detection through community outreach efforts and provides wellness screenings at no cost for individuals aged 18 years or older. Wellness screenings conducted by our staff and certified volunteers measure blood glucose levels, hemoglobin A1C, blood pressure, heart rate, pulse oxygen, and body mass index. At SNMDO, we believe every person should have an equal opportunity to access diabetes detection services. In efforts to carry out our mission, SNMDO's screening program travels to health fairs, schools, businesses, and other events in the community within the southern region of New Mexico.

Please contact us [if](#) you would like SNMDO to attend your event.
