

SHARE new mexico™

Southwest CARE Center

Our focus has always been on providing evidence-based, compassionate, whole-person care in a judgment-free environment. That includes the physical, emotional, social, and environmental needs of our patients. An interdisciplinary team of doctors, advanced-practice clinicians, nurses, pharmacists, behavioral health professionals, and support staff provide comprehensive primary care and specialized health services tailored to each patient's unique needs. We ensure that patients from all walks of life, including the economically, socially, and culturally vulnerable have access to exceptional medical care—regardless of their ability to pay.
