Ancestral Lands Acoma

The Ancestral Lands program is rooted in the culture and heritage of local tribal communities. The power and impact of Ancestral Lands programming is due to the community investment and support for each program tribally and locally, combined with the network of operational support from Conservation Legacy. To date there are 17 different Ancestral Lands programs operating both nationally and on the local level.

Conservation Legacy established the Ancestral Lands program model in 2008 based at Pueblo of Acoma, New Mexico, and has since worked with multiple Native American communities to expand and replicate this model.

Conservation Legacy is a national non-profit that is dedicated to supporting locally based conservation service programs that empower individuals to positively impact their lives, their communities and the environment.
