

## Transcranial Magnetic Stimulation

### BrainsWay Deep TMS Treatment for Depression

Deep TMS (dTMS) is a revolutionary depression treatment that has changed the field of mental healthcare, dTMS has been FDA-cleared to safely and effectively treat Major Depressive Disorder through BrainsWay's patented H-coil technology.

dTMS works by utilizing a magnetic field that manages to directly reach wider and deeper brain regions, regulating the neural activity of brain structures related to depression – specifically the dorsolateral prefrontal cortex (DLPFC).

[Repeated](#) peer-reviewed [studies](#) have found dTMS to be a [highly effective](#) treatment that can facilitate a [profound improvement](#) in patients' mental health, alleviating symptoms of depression and contributing to a significantly greater quality of life.

As a non-invasive procedure, dTMS is a well-tolerated treatment that does not cause any adverse or long-lasting side effects. It does not require a significant recovery period, and the 20-min treatment can easily be integrated into each patient's day-to-day schedule.
