Professional Development Center and SPED Services

Our Professional Development Team is focused on aligning district and school supports so that every door is open for every child to be successful in school and their community. We are passionate about student learning and believe every child can learn if we teach them using engaging, empowering, and differentiated techniques. Our highly skilled and dedicated staff accomplishes this work through regional and onsite training, modeling and coaching for teachers and administrators: teacher mentoring and workshops, including Special Education Specific workshops. We serve the school districts of Animas, Cobre, Deming, Hatch Valley, Lordsburg, Reserve, and Truth or Consequences.
