Southwest Research and Information Center

* Uranium Impact Assessment - Works with affected communities to build capacity to address public concerns about past and new uranium mining; assesses impacts and disseminates information on the health and environmental impacts of uranium mining and milling; and implements a study of the effects of chronic uranium ingestion on kidney health among Navajos.* Energy and Natural Resources Policy - Assists communities adversely affected by pollution and resource development to find community-based solutions, prevent new environmental threats, fight corporate abuse and power, and increase their direct participation in the protection of their lands, water, health, and cultures; and informs the public about threats to the environment, regional cultures, and democratic traditions from pollution and resource development.* Nuclear Waste - Provides technical assistance to community groups regarding nuclear weapons production and waste facilities; and promotes citizen involvement and safer waste management and disposal policies.* Fiscal sponsorship - Provided for community groups with similar missions.
