Women Empowerment

This is a twelve-month curriculum that teaches skills women can use to enter or re-enter the job market. Skills include sewing, fashion design and crafting. In addition to sewing instruction, students will learn basic financial skills from a trained financial adviser, resume writing and interview skills from a job counselor, how to dress for an interview, and basic employment etiquette, such as on-time arrivals, calling when late, scheduling time off with supervisor's approval.

Our program teaches women independence and self-reliance using sewing as the platform. The course is offered free to qualified women. It is 6 hours per day, 4 days per week for 50 weeks. The duration of the program is designed to provide stability and continuity, as well as a safe place to go while women reestablish themselves. Shorter programs do not give the stability needed to work through the vicissitudes of making new lives.
