UNM Midwifery Overview

Since 1975 the UNM Midwives have provided excellent pregnancy, postpartum, and well-woman care to the women and families of our community. We strive to provide gentle, respectful, and compassionate care to all women. Our group of 12 Certified Nurse-Midwives (CNMs) have an outstanding reputation and have attended more than 10,000 births at UNM Hospital.

As midwives, our philosophy includes honoring the individuality of each woman and respect for birth as a natural process. We collaborate and work closely with the women and families we serve and with the physician teams here at UNM Hospital.

The UNM Midwives love the work we do and look forward to caring for you.

Parent Organization

University of New Mexico - Department of OB/GYN - Midwifery Division

The UNM Midwives are dedicated to supporting women and families throughout pregnancy and the birth process to promote safe and positive labor and delivery experiences.

Our CNMs have education, knowledge, competence, skills, and confidence in supporting physiologic labor and birth, including helping women cope with pain. We recognize each labor and birth are different and a

momentous experience for women and families. Our midwives are gentle and patient and support women to labor and birth in their own time and own way.
