## Catapulting Career Pathways

Catapulting Career Pathways is a 5 week summer STEAM (Science, Technology, Engineering, Arts and Mathematics) hands-on "boot camp" for middle school students. Students will work in teams to research, design, build, test and present solutions to a problem under the tutelage of mentors from local business and technology companies. They will be introduced to web content creation, training in design thinking and lean startup methodology while learning essential programming (coding), presentation, workforce readiness and relational skills. Teams will be coached to prepare professional demonstrations of their solutions and compete for prizes. All students who successfully complete the summer camp will receive computer tablets.
